

Commonly required Lucas parts for starting and charging.

This table has been put together using information from part of an old Lucas master parts catalogue, at the moment it is about 40% complete, it is intended to be a simplified guide to where spares are interchangeable between makes of vehicle.

Where the part number consists of only five numbers followed by letters, I understand from the old Lucas information that the letters refer to internal changes to the design, if the five numbers are the same the items can be exchanged as complete units. (this does not apply to the older 6 digit part no's)

Where the part number has a star in front of it, this means that the item has been replaced by a later alternative.
