

## LUCAS DISTRIBUTOR PART NUMBER LIST

The two tables below are intended to assist you in identifying which vehicles use which distributor

The table below has been put together using old Lucas parts catalogues as a source of information, it is aimed at the car owner who is looking for a used spare for his vehicle or the auto jumble trader who has distributors for sale but is not sure how many different vehicles they fit, all this information has been put together in good faith using old wall warn books, though we do our best to cross check the information, we cannot accept responsibility for any problems caused by errors in this document.

The tables cover most cars and some light commercial vehicles manufactured using Lucas distributors between 1946 and 1960.

Please note that the first table covers Lucas part numbers with six figures without any letters after it, these are older numbers and were superseded by the five-figure number with a letter suffix.

The second table covers Lucas part numbers with five figures followed by a letter suffix.

I understand from the old Lucas data that the suffix letters relate to internal changes in the design and provided the main five-figure number is the same they are interchangeable as a unit.

<b>TABLE OF LUCAS DISTRIBUTOR EARLY SIX FIGURE PART NUMBERS TO CROSS REFERENCE TO WHICH MAKE AND MODEL OF VEHICLE THEY WERE USED ON, ALSO INCLUDED IS THE MODEL AND TYPE AS WELL AS THE LATER 5 FIGURE PART NUMBER THAT REPLACED THEM</b>
